Introduction

The District Improvement Plan (DIP) has been designed to provide schools and districts with a common planning template that addresses student learning and system needs that have been identified through the schools' Comprehensive Needs Assessment. It has also been designed to address any federal, state and locally required elements that must be contained in a School Improvement Plan.

Executive Summary

Introduction

Every school system has its own story to tell. The context in which teaching and learning takes place influences the processes and procedures by which the school system makes decisions around curriculum, instruction, and assessment. The context also impacts the way a school system stays faithful to its vision. Many factors contribute to the overall narrative such as an identification of stakeholders, a description of stakeholder engagement, the trends and issues affecting the school system, and the kinds of programs and services that a school system implements to support student learning.

The purpose of the Executive Summary (ES) is to provide a school system with an opportunity to describe in narrative form the strengths and challenges it encounters. By doing so, the public and members of the community will have a more complete picture of how the school system perceives itself and the process of self-reflection for continuous improvement. This summary is structured for the school system to reflect on how it provides teaching and learning on a day to day basis.

Description of the School System

Describe the school system's size, community/communities, location, and changes it has experienced in the last three years. Include demographic information about the students, staff, and community at large. What unique features and challenges are associated with the community/communities the school system serves?

Lawton Community Schools is a rural school district centered around the Village of Lawton and the townships of Antwerp, Porter, and Prairie Ronde in Van Buren County. The district serves approximately 1,000 students, of whom over 100 attend annually under School of Choice Agreements. The district's population includes individuals who work in our community fruit processing, fruit growing, and trucking industries as well families who work in the nearby cities of Kalamazoo and Portage. Nearly seventy percent of students attending Lawton Community Schools qualify for free or reduced lunch in the Federal School lunch program, and a growing number meet the definition of homelessness. Our community is among our greatest strengths. We maintain close partnerships and good cooperation with the village and are continually boosted by the infectious pride of our families and alumni.

Among Lawton Community School's reported strengths are the community's support of school activities including athletics and participation in school events. The school buildings are considered to be well-maintained and beautiful facilities as well as primary gathering places within the community. Parents' feedback indicates that Lawton Community Schools is a safe and orderly environment that is willing to meet the needs of all learners. Lawton Community Schools is a tight knit community including dedicated staff at all levels of the organization and a school board anxious to safeguard the academic and fiscal future of the school district, its residents, and its children.

Our district is driven by a desire for continuous improvement. We are guided by a Strategic Plan, developed in cooperation with the Michigan Association of School Boards in the fall of 2013. Through this plan, we have renewed focus on some overarching goals including fiscal responsibility, academic rigor, innovative use of technology, and improved two-way communications with families and our community. This plan has also provided a strong emphasis on establishing a college and career ready culture that provides a rigorous and appropriate education for each child, including our youngest learners. Lawton Community Schools features small school attention and big school opportunities. Our community and our families proudly join us in saying, "Go Blue Devils!"

System's Purpose

Provide the school system's purpose statement and ancillary content such as mission, vision, values, and/or beliefs. Describe how the school system embodies its purpose through its program offerings and expectations for students.

Lawton Community Schools centers its work upon the mission statement, "Lawton Community Schools exists to provide meaningful opportunities that challenge each student to reach their potential. Through strong connections with students, families, and the community, we will prepare our students with the 21st Century Skills necessary to compete in a global economy." This mission is reviewed annually by the Board with stakeholder input. The vision associated with this goal is "Preparing all students for college, career and community success through high expectations, individualized attention, and organizational excellence." The following Belief Statements support both the vision and mission of the district.

High expectations lead to increased performance and must exist for the learning of every student.

All students deserve opportunities to maximize their talents and reach their potential.

We have a collective responsibility to create and sustain a safe environment that is respectful, engaging, vibrant and culturally responsive.

Effective instruction maximizes the learning potential of every student.

The educational process is most effective when students, families and the community collaborate with highly effective educators who know each student on a personal level and work to ensure each child's success.

Our educational mission must include the development of responsible citizenship through an emphasis on strong character and student leadership.

Our efforts should reflect current best practices in all aspects of the educational process.

Innovation and creativity are essential components of a 21st century education.

Forward thinking and effective planning will allow our schools to meet the needs of our students now and in the future.

All students should be prepared with the skills necessary to achieve college, post-secondary training and work place success.

The Board, Administration, and Staff of Lawton Community Schools strive to embody these purposes through thoughtful decision making. These include a strong system of academics and the use of data to improve instruction as well as student achievement.

These also include the work of the Board to continue to keep the district fiscally healthy without sacrificing programs essential to academic growth or a well-rounded student environment.

Notable Achievements and Areas of Improvement

Describe the school system's notable achievements and areas of improvement in the last three years. Additionally, describe areas for improvement that the school system is striving to achieve in the next three years.

Lawton Community Schools continues to shine. The district actively pursues districtwide student achievement goals. The district features a positive behavior support approach to student behavior in all buildings and has seen a decrease in the number of incidents affecting academic time. The elementary and middle school have completed and institutionalized the work of the MiBLSi process. The district has maintained valuable partnerships with the Kellogg Biological Station through Michigan State University as well as through the Kalamazoo Symphony Orchestra and local organizations including our Lion's Club. Reading is improving district wide for all learners through a system of supports led by Benchmark testing, targeted intervention, and progress monitoring.

Also, among the strengths of our district, are emphases on professional collaboration and quality instruction in all areas. We are early adopters of the 5D+ research-based model for teacher evaluation and have used it as a professional learning tool to implement shared best practices from preschool through twelfth grade in all subject areas. Recent accreditation visitors characterized our instruction as both the most consistent and highest quality that they had seen.

In the coming years, a number of goals will take precedence as the aforementioned goals and strategies become more institutionalized. Among the greatest of these goals is meeting the challenges of the Common Core and the M-Step Assessments through deep collaboration. This requires not only a greater level of collaboration but also an explicit and clear communication among all professionals. Other areas of improvement beginning now include the true involvement of and two-way communication with all stakeholders. We also continue to attempt to close achievement gaps among our students.

Along with our community, the district has begun engaging in a strategic plan facilitated by the Michigan Association of School Boards. This plan includes a number of academic goals including early childhood education and availability of rigorous instruction. In this vein, we are working to create a college and career ready culture in all of our buildings and providing increased rigorous instruction including additional Advanced Placement Offerings and a STEM program following the Project Lead the Way curriculum.

Ultimately, our goal is to maintain our ability to balance the attention to each learner each day afforded by a small school with the availability of big school opportunities appropriate to each child.

Additional Information

Provide any additional information you would like to share with the public and community that were not prompted in the previous sections.

Lawton Community Schools has long taken a stance that persistent, continuous improvement is vital to a school district wishing to provide both a small school atmosphere and the advantages of a resource rich district. Our greatest resources in this pursuit are our people: our Board, our Staff, our Parents, our Students, and our Partners. We plan to continue to work together to use the smartest way possible to meet goals while being fiscally responsible. As we meet these goals, we also plan to keep our vision on the horizon and continuously set new goals for the betterment of our district and our community. Our students continue to be our highest priority.

Improvement Plan Stakeholder Involvement

Introduction

The responses should be brief, descriptive, and appropriate for the specific section. It is recommended that the responses are written offline and then transferred into the sections below.

Improvement Planning Process

Improvement Planning Process

Describe the process used to engage a variety of stakeholders in the development of the institution's improvement plan. Include information on how stakeholders were selected and informed of their roles, and how meetings were scheduled to accommodate them.

Stakeholders included in the District Improvement Plan include parents and community members, Board Members, and members and of the instructional, administrative, and support staff.

While the most essential meeting is our spring School Improvement Planning meeting each year, follow up is provided through committees, surveys, and other opportunities for participation and input.

In 2013, as part of an extended Strategic Planning Process, a community day long meeting was held with an outside facilitator from the Michigan Association of School Boards. As a result of this experience, district wide committees have formed with a wide range of stakeholders.

In 2014-2015 we planned for upcoming on site reviews from NCA. In preparation for this process, we were able to conduct and review stakeholder surveys using the tools provided by NCA. This provided valuable follow up on the strategic planning survey and will provide growth data as we continue to gather stakeholder input.

Describe the representations from stakeholder groups that participated in the development of the improvement plan and their responsibilities in this process.

Stakeholder groups whose input are requested in all school improvement plans are the School Board, Parent Teacher Organization (K-12), Parents, Teachers, Support Staff, Alumni, Community members and Students. Primary work on the school improvement plan is part of all planning sessions. Annually, all members of the Lawton Community Schools' staff, along with community members, meet to view a data profile and review our mission, vision, and points of pride as well as our district goals.

Explain how the final improvement plan was communicated to all stakeholders, and the method and frequency in which stakeholders receive information on its progress.

The final improvement plan will be presented to the Board of Education in a public meeting then will become part of the annual profile review. Relevant goals are posted within buildings and mission and vision statements are on school communications.
